

Upgrade to
smarter living
with Hindware Kitchen Appliances

hindware™

smart appliances

A kitchen is a place where reinvention and transformation happen. Be it the ingredient of a recipe or age-long way of cooking. The evolution of the existing spectrum brings in the possibilities and opportunities. This is embodied in everything we do. In every idea, every design and every product.

We are Hindware Home Innovation Limited (HHIL). We are a customer-first entity with distinct business divisions and multiple brands that collectively serve the objective of fulfilling the needs of millions of households in India.

Coming from the house of Hindware, the Consumer Products portfolio consists of a selection of household appliances under brand "Hindware Smart Appliances"

We bring delight that does not limit to conventions. We offer elegant design and innovative features in the range of kitchen appliances, such as kitchen chimneys, built-in hobs, cooktops, built-in ovens & microwaves, kitchen sinks, dishwashers, induction cooktops, water purifiers, food waste disposers. We have wide range of air purifiers, air coolers and fans as well. We are in storage, instant, and gas water heaters by brand 'Hindware Atlantic'.

Through the brand EVOK, we offer a range of furniture, home decor and furnishing, wall fashion, modular kitchen, and wardrobes, and engineered wood furniture.

We also forayed into the furniture and kitchen fittings segment, through brand 'FGV powered by Hindware' and distribute a wide range of hardware products in India, such as normal and soft close hinges, side and bottom mounted drawer channels, and drawer systems.

Our products bring convenience, comfort, and ease of use, through contemporary designs, myriad styles, and high functional efficiency. We pride in knowing that we make a difference in our customers' lives.

IoT Chimney

Internet changes lives, IoT transforms them.
